ANNOUNCEMENT

In order to avoid senseless duplication, and speed the availability in English translation of original Soviet research, we shall, starting with the present issue, no longer translate those items in the "Scientific and Technical News" section which are reports concerning Western research and development and which are essentially abstracts of material originally published in English-language periodicals.

Furthermore, we shall not reprint material such as, the address by G. T. Seaborg which appeared on page 21 of this issue of Atomnaya Energiya, and which is readily available in English from other sources.

We shall continue to present the complete translated text, including all tabular and illustration material, of all research and review articles, editorial notes and announcements, book reviews, bibliographies, etc., and all news items of other than United States or British Commonwealth origin.

The Table of Contents will continue to list all material which appeared in Atomnaya Energiya, but those items which originated in the English language and are therefore not included in the translation will be enclosed in brackets. Whenever possible, the source from which English copies of the omitted reports can be obtained will be given.
